Cruising for connoisseurs...

About the company

Since our introduction to the world of luxury yacht charters six years ago, our aim has been to consistently offer the highest cruising quality possible. To achieve this we have put tremendous efforts into ensuring that our ships offer unprecedented levels of comfort and quality.

Ranging from the exquisite meals to the interior and exterior aesthetics of our yachts, which are meticulously kept at their finest. These traits, combined with the exceptional service and competence of our professional and ambitious crews are what have given us our global reputation to date.

Deciding on the ideal route for your cruise

We offer cruise itineraries that are tailor made to suit your personal timescale and particular interests. Our fleet is based in the historic city of Bodrum. Our sailing waters and embarkation ports span from the Greek islands of Nisos and Patmos in the west, down the beautiful Turkish Riviera and Greek islands like Cos, Simi and Rhodos, to Antalya in the East. Our captains know of the finest locations, be they of historic value, scenic beauty, or rural village life. They look forward to sharing Turkey's coastline's best kept secrets with you.

The finest cruising experience available

A cruise aboard our yachts offers discerning guests the opportunity to completely unwind and explore Turkey's exceptional coastline, with breathtaking sceneries and historic abundance, at a leisurely pace in an atmosphere of pure luxury. Experience a relaxing holiday on board our luxury yachts, taken care of by our skilled captains and their discreet yet efficient crews.

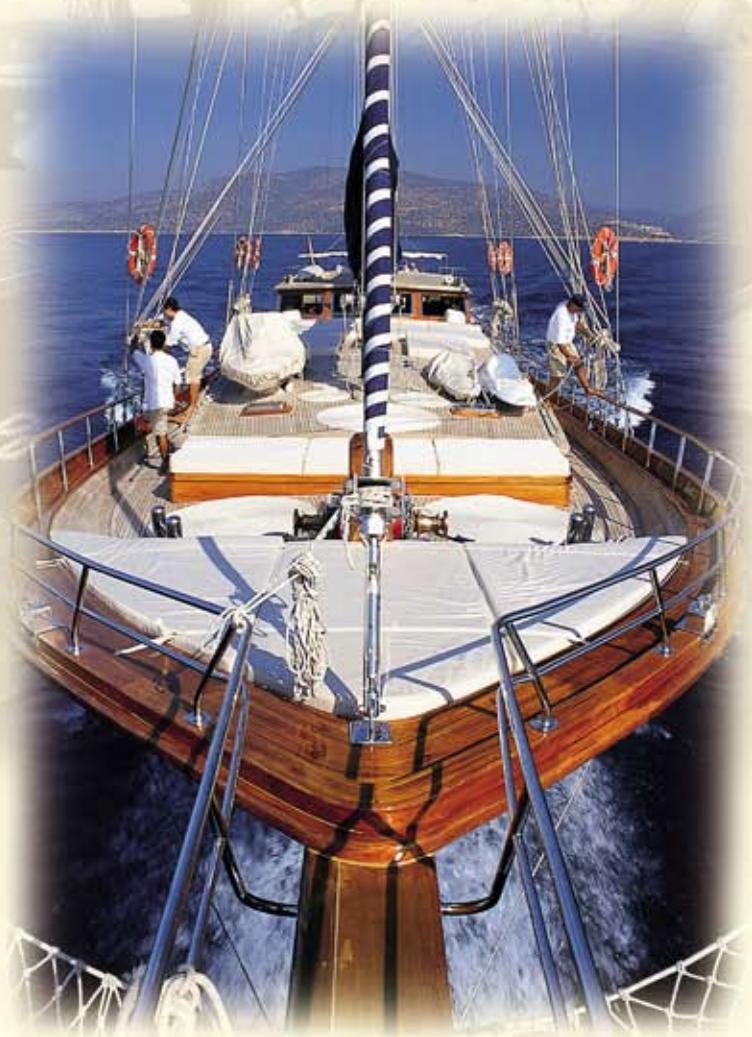

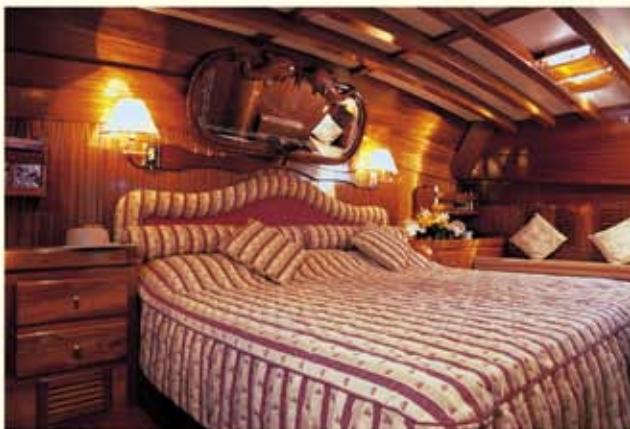

Yacht Building at its finest

Our first vessel built in Turkey in 2000 was considered to be the finest ship ever to come off a Turkish shipyard. All yachts are constructed to Lloyds' specifications and incorporate the highest quality materials and equipment to ensure maximum cruising and sailing performance as well as complete safety for those onboard.

Spacious cabins with en suite bathrooms, shower cubicles, and elegant mahogany and marble surrounds further complement the luxury feeling.

Located a few steps up from the cabin areas are the saloons that complete the experience by comprising dining areas with soft seating, steering and navigation stations, bars and comprehensively equipped galleys. All interiors are tastefully decorated with air conditioning and heating throughout.

With shade during the day and warm evening breezes, the aft decks are the place to dine. The tables seat ten comfortably. Lounging cushions further aft provide the ultimate after dinner interlude while sun mattresses spread over the expansive foredecks give plenty of space to a full complement of guests.

Savor the Orient

Turkish cuisine with its myriad flavors and fresh ingredients is highly influenced by its Ottoman heritage. To dine on Turkish food is to dine on centuries old recipes. As a result of this once imperial cuisine, Turks have a raised expectation of, and appreciation for, good food. Our chefs possess unsurpassed understanding of the finest Turkish dishes and the preparation thereof. But their knowledge of western cuisine is just as varied to guarantee absolute culinary fulfilment.

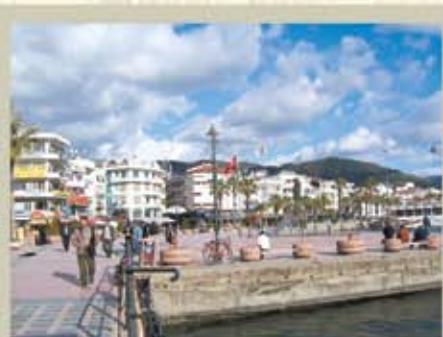

BODRUM

BODRUM is located on the South-West bank of Turkey, one hour's sail North off the Greek island of Cos and just West of the breathtaking bay of Gökova. The city is a truly a sight to behold with its distinctive architecture, welcoming atmosphere, and its overall exclusive style. It has proven to be the finest location for yachting enthusiasts to commence their cruising experience, thanks greatly to its Yacht Marina of international stature and its vivid night life which features everything a weary sailor might look forward to. The abundance of the vibrant nightlife and fine boutiques entwined in beautiful natural surroundings make it the ideal place for outsiders to catch a glimpse of Turkey's rural lifestyle whilst at the same time enjoying the high class that this city provides.

MARMARIS

MARMARIS is situated in an enclosed bay on the old Lycian shore, close to where the Mediterranean and Aegean sea meet 85 miles east of Bodrum. The Greek island of Rhodos lies close by at only 20 nautical miles, and is visible on clear days from the bay's sea side. Besides its many restaurants, beach - and nightclubs, and it's city centre with expansive bazaar, it is also home to one of the largest yacht harbours of Turkey.

Memorable sights...

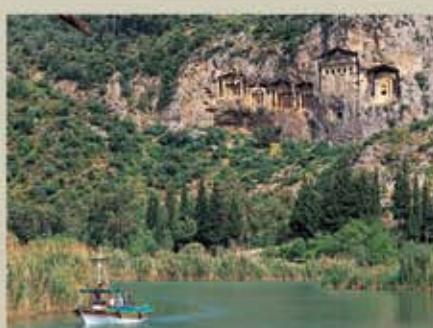

SIGHTS OF BODRUM

St. Peters Castle: This sturdy fortress is one of the world's best preserved monuments from medieval times. It stands in the center of the Bodrum bay as a solid testament to the Bodrum area as a place worth defending. It was built by the Knights of St. John, a group of European expatriates. The fortress became known as the Castle of St. Peter, The Liberator, because it served as the sole place of refuge for all Christians on the west coast of Asia Minor. The castle now serves as a museum for underwater findings from several recent shipwreck excavations. In fact, it is the most prominent nautical archaeological museum in all of Turkey. The castle inner garden is home to a vast selection of plant life. The collection represents nearly every plant and tree of the Mediterranean region.

The Mausoleum: Bodrum sports a number of great historical landmarks. In the ancient world it was even the home of one of the seven wonders of the world, the Tomb of King Mausolus (now called the Mausoleum), small remnants of which still remain visible.

KNIDOS

Located at the far West end of the Datça peninsula, 24 miles from the quaint traditional fishermen village of Datça, lie the ruins of the Dorian harbour city of KNIDOS. This is one of the most important historical settlements on the West Anatolian coast. The temple of Aphrodite, goddess of love, once home to one of the most beautiful statues of ancient times, the Aphrodite statue by Praxiteles. One will also take notice of the remains of what used to be the market square, a necropolis, a city wall, and no less than two theatres.

DALYAN & CAUNOS

The ancient city of CAUNOS (antique name) with its well preserved amphitheatre and many elaborate Lycian rock tombs cut into the faces of distant cliffs, is renowned as one of the greatest of all archaeological sites in Turkey. Caunos is located to the East of Bodrum, close to the fishing village of DALYAN. From here, small boats carry visitors through the intricate shallow passages of thick reeds that fill the Dalyan River. Another worthy visit is the rejuvenating hot sulphur springs where the small boats can stop on the way back from the ruins.

GÖCEK

GÖCEK is an extremely quaint township located on the northern shore of the Gulf of Fethiye, at a distance of 14 miles from Dalaman International Airport. It is an important center of tourism. Especially if you want the finest in sailing, Göcek is another favourable starting point. The area is filled with quiet, unspoilt coves with lush green pine forests that spill down to the warm turquoise waters. As most towns and cities along the Aegean shore, Göcek too bears many traces of ancient civilizations. The partly submerged ruin of Batikhamam (sunken hamam) is actually referred to by the locals as Cleopatra's Bath.

XENOS I

At 61 feet Xenos I is the most modestly sized of the Xenos fleet. She is the yacht of choice for all those who enjoy to sail aboard a more cozy yacht, without having to make concessions when it comes to comfort and luxurious style. Being a traditional Tirhandil in design, she has been engineered and equipped to be the most exclusive Tirhandil in the Aegean Sea. The service level and experience of her captain and crew are of the highest possible standards.

Saloon

XENOS IV

Xenos IV is the latest addition to the Xenos fleet. With her 106 feet she is the ultimate superlative to the deluxe classic yachts that sail the Aegean waters today. No expense has been spared to ensure that she provides her passengers with the most luxurious array of facilities available. These include full laundry service, flat-screen DVD players and mini-bars in all cabins. Her vast decks and spacious cabins give passengers the feeling of total freedom. Her oversized tanks allow for longer cruising distances to Greek islands to be overcome with ease, making her the ideal yacht for all those who wish to sail beyond the Turkish waters.
